

BOTTLE DRIVE GUIDELINES

We work with countless non-profits such as scout troops and schools for their fundraising. We make it very easy and straightforward. Unlike other redemption centers, we do not require you to sort returnables by manufacturer. We do the hard work for you!

Just **COUNT** them as follows by **SIZE** into **SEPARATE CLEAR BAGS**:

- 12-24oz water: 100 per bag
- 12-24oz soda: 100 per bag
- 1 Liter: 50 per bag
- 2 Liter: 35 per bag
- Cans: 200 per bag

All glass bottles **MUST** be brought back in **BEER BOXES**. We will not accept any other type of boxes. You must either have 12pk, 18pk, or 24pks. We will not accept any other boxing increments.

We will **NOT** accept any bag that does not meet above guidelines. It is okay if there are just a few bags that do not fill up to above count, we can count those on our automated counting machine.

OR...

If you decide to not count all your bags, try your best to fill up to above counts to the best of your ability. We will choose few bags of each sizes above and have our automated counters count them up and **average** it out.

This is the fastest and easiest way to handle bottle drives!
